Reality ↑
I believe beliefs matter:
   Truth is absolute
   Knowledge is relative
   Value is complex

Character ←
I believe in Conscious Moral Choice μ:
   Conscious in Knowledge to predict consequences
   Moral in Wisdom to optimize total value
   Choice in Freedom to find alternatives
      for creating or rewarding value

Community →
I believe value needs to be χ Created, ρ Recognized, & ν Normalized:
   χ The best human act
      is the conscious moral choice μ
      to use my resources
         to create value for others
   ρ The next best act
      is to reward others
         as they create value for me
   ν Relative value
      is best determined
         by honest collaborative inquiry
            into competing alternatives

Humility ↓
I believe everyone wants to believe they are good:
   The Wise examine Character ←
   The Wicked shrink Community →
   Fools deny Reality ↑
      & All of them are me ↓
